

Screen Listing for Brick.java

```
1 class Brick {
2     void m(int i, double d) { }
3     void m(double d, int m) { }
4
5     {
6         m(1, 2);
7     }
8 }
```

Compiler Output

```
Brick.java:6: error: reference to m is ambiguous,
both method m(int,double) in Brick and method m(double,int) in Brick match
    m(1, 2);
    ^
1 error
```
