

# Visual Markings Cheat Sheet

---

Symbol    Description

---

`code`

Indicates the starting location of the error.

`code`

Indicates issues related to the error.

Arrows can be followed. They indicate the next relevant location to check.

Enumerations are used to number items of potential interest, especially when the information doesn't fit within the source code.

The compiler expected an associated item, but cannot find it.

Indicates a conflict between items.

`code`

Explanatory code or code generated internally by the compiler. The code is not in the original source.

Indicates code coverage. Green lines indicate successfully executed code. Red lines indicate failed or skipped lines.
